AgSafe® 3-0-6 Throw-Tabs™ Pond Plant Food Tablets

AgSafe® Throw-Tabs™ contain special slow-dissolving water soluble fertilizers, micronutrients, sea minerals, and organic additives to feed all types of waterlilies, floating, oxygenating, and submerged pond plants. Ideal for feeding water hyacinths, clover, poppy, lettuce, parrot feather, anacharis, etc. Pre-measured convenient tablet...no more hassles of measuring and using expensive liquid plant foods and stimulants. Contains NO Nitrates and Free Phosphates that cause algae blooms and cloudy water. Fish Safe. Will Not Harm Aquatic Life.

Why get wet to feed your pond plants, when you can just throw a tablet into the pond near the plants...Fast, Easy, it's that Simple!

How Throw-Tabs Work

Small amounts of Ammonium Sulfate supply quick release nitrogen for the pond plant to get a rapid start. Needed quantities of potassium and micronutrients complete the formula and provide an ample reserve of all major elements except Phosphate. Some ponds and waterways already have high levels of phosphates and No Phosphates are added to the formulation. In addition, there are no Copper additives in the formulation. Copper tends to accumulate in the ecosystem and affect snail populations. The pond plants can obtain their phosphate needs directly from the water supply. Humus and organics provide humic acid which helps to regulate pH and provide an organic media for increasing beneficial soil bacteria for better plant nutrient uptake. Additional Fish and Plant Extracts help to supply 76 trace minerals, natural plant vitamins, growth hormones, and alleviate any plant stress or transplant shock.

ADDITIONAL BENEFITS:

- o High Magnesium to assist in growth and chlorophyll production
- o High Iron to correct and prevent iron chlorosis (yellowing)
- o Potassium and Magnesium ratio best for pond plants
- o Chelated Micronutrients for fast plant assimilation of elements
- o Natural Humic Acids to promote better rooting, regulate pH, and provide a natural organic substrate for proper plant development.
- o Plant Extracts supply 76 trace marine minerals and rapid growth hormones.
- o Fish Emulsion provides a good source of plant vitamins and hormones.
- o Yucca Extracts provides natural saponins, a natural rooting bio-stimulant, for better nutrient uptake and reduces plant temperature shock.

PRODUCT SIZES & GENERAL USAGE:

A136 Small Retail Blister 40 Tablets (5gm each) 24 Blisters/case

Ideal for small pond owner. Enough to feed 3-4 plants 10 feeding applications.

A139 Large Retail Bottle 300 Tablets (5gm) 4 Bottles/case

Small Grower and Landscaper Size. Enough to feed 900 sq. ft of Pond Plant Spread.

A142 Growers & Landscapes Bulk Case 2100 Tablets (5gm)

Grower and Restoration Project Size. Feeds 2100 starter plants or 6300 sq. ft Plant Spread.

SUGGESTED APPLICATION:

New Plantings: Insert the recommended number of Throw-Tabs into soil 2-3" deep near plant root ball area during planting. Apply one Throw-Tab for every 1" of plant container size (i.e. a 2" starter plug requires 2 tablets). Feed again after 2-3 weeks as an established plant.

Established Plants: Just throw tablet(s) into pond water near plants. Apply one Throw-Tab for every 3 ft. of pond plant spread whether floating or submerged. Repeat feeding application 1-2 weeks during growing season or when needed.

NOTE – When applying in Free-flowing Rivers and Water-ways – only apply tablets near shoreline pond plants not directly into free-flowing waters.

GUARANTEED ANALYSIS:

F1400

Total Nitrogen (N)	3.00%
3.00% Ammoniacal Nitrogen	
Soluble Potash (K ₂ O)	6.00%
Magnesium (Mg), Total	3.00%
3.00% Water Soluble Magnesium (Mg)	
Sulfur (S), Total	3.00%

ARCHITECT SPECIFICATIONS AND LANDSCAPE CONTRACTOR COMPLIANCE:

The landscape contractor shall demonstrate architect specification compliance by showing invoices to prove the purchase of the AgSafe® Throw-Tabs™ in sufficient quantity to cover the entire landscape project at the recommended application rates. In order to achieve best results, the above recommendations should be written into architect plans and specifications to be followed closely by the landscape contractor.

CAUTION:

Keep Away From Children and Pets. Do Not Swallow or Ingest. Store in Cool Dry Place. Not For Aquarium Use. When applying in rivers and waterways – feed plants near shore line only, not directly into free flowing waters. Follow Directions as Labeled with Product.

Disclaimer & Limited Warranty:

The above information provided herein is, to the best of AgriTab Corporation knowledge, accurate and reliable, and is intended to provide general use information. AgriTab Corporation makes no

warranty or guarantee, expressed or implied, as to the accuracy or reliability, and shall not be liable for any losses or damages arising from the use of this product. AgriTab Corporation shall not be liable for any damage or injury resulting from improper use, from any failure to adhere to above said recommendations and practices, or from any improper hazards inherent in the use of this product. As with any fertilizer product, we suggest fertilizer trials be performed to determine proper feeding methods and rates for your specific applications. The full liability of the use and handling of this product is the sole responsibility of the User or Buyer. The limited warranty of this product only covers the fertilizer guaranteed analysis and its components. Defective product is remedied to the User or Buyer for only the replacement cost of the product. Any questions regarding product, usage, storage, application, etc. – please contact AgriTab Corporation 1-800-398-3803. Material Safety and Data Sheets (MSDS) are available upon request.
