

**AgSafe®**  
**Cactus-Mist™**  
**Water Soluble Plant Food**

Concentrated 4-28-24 plant food formulation (1:7:6 ratio) used by professional growers for feeding all types of cacti and succulents. Contains high 4% calcium for strong plant structure, micronutrients for plant metabolism and brighter cactus blooms, humic acids for regulating soil pH and supplying natural organics, sea kelp extracts to supply 76 trace minerals and plant growth hormones, yucca extracts to supply natural saponins to fortify plants against environmental stress and changing water conditions, fish extracts to supply natural vitamins and amino acids, and mycorrhizae to expand rooting and increase nutrient uptake. Cactus-Mist™ contains NO UREA, which may cause root damage or inhibit root growth.

Suggested Application: Prepare feeding solution by adding ½ tsp in one gallon of water (preferably non-soften water to reduce the sodium levels). Apply feeding solution as a soil drench until feeding solution begins to drain at the bottom of the pot. Apply feeding solution to cacti every 10-14 days during the growing season. During the dormant season, apply feeding solution every 3-4 weeks so the potting mixture can dry, or apply just enough feeding solution so that the cacti show no sign of shriveling or weakness. For some sensitive cacti and succulents use ½ Cactus-Mist™ dosage. No other fertilizer is necessary during Cactus-Mist™ feeding.

<b>GUARANTEED ANALYSIS</b>	<b>BY WT</b>
<b>Total Nitrogen (N)</b>	<b>4.00%</b>
<b>3.2% Nitrate Nitrogen</b>
